

Hydro One Environmental Policy

Hydro One, as Ontario's largest transmission and distribution company with operations across the province, is committed to protecting the environment for current and future generations.

At Hydro One, we will deliver electricity to our customers and manage our operations in an environmentally responsible manner. We will comply with all applicable environmental legislation and Hydro One's voluntary commitments. We will design, build and operate our facilities to make efficient use of resources and to prevent pollution. We will manage any adverse environmental impacts that may result from our activities. We will strive for continual improvement of our environmental management system and performance.

Our Commitment

- We will ensure employees understand their roles and responsibilities as outlined in the Hydro One environmental management system and have the skills, knowledge and resources necessary to perform these duties. We will hold our contractors to the same high standards.
- We will identify, assess and manage significant environmental risks and integrate environmental considerations into our decisions.
- We will report environmental incidents and take immediate action to mitigate environmental impacts.
- We will improve our performance by setting environmental objectives and targets, monitoring our performance and initiating corrective and preventive actions when required.
- We will work cooperatively with governments, customers, suppliers and other stakeholders to develop programs that contribute to improving our environmental performance.
- We will investigate and, where prudent, use new environmental technologies that will help us achieve our business objectives.
- We will report our environmental performance to employees, shareholders, the public and other stakeholders and celebrate our achievements.
